

Site Engineer

Paralos Energy, a well-established energy projects construction company, is seeking to recruit a Site Engineer with or without previous experience in the construction management of energy projects. The Site Engineer will join our Projects Team to plan and oversee a wide variety of energy projects from beginning to end, including but not limited to High Voltage Substations, Wind Farms, and HV/MV Transmission Lines, in Greece as well as abroad.

Your Responsibilities

- Be responsible on site for all construction-related operations.
- Ensure that all equipment and supplies arrive on site on time.
- Coordinate subcontractor works and ensure that Paralos Energy standards are met.
- Report regularly to the Project Manager.
- Ensure deadlines are met and take immediate action, if necessary, to stay on track according to the project schedules.
- Prepare weekly project reports and HSE and environmental reports for incidents, if necessary.
- Ensure compliance with safety regulations and building codes.
- Collaborate with subcontractors, engineers, and key members of the project team.

Your Qualifications

- Hold a Civil or Survey Engineering Degree.
- Have good knowledge of the design of civil systems, Quality, H&S and Environmental requirements, and technical norms and regulations.
- Be fluent in English. Knowledge of other languages will be considered an advantage.
- Have good knowledge of Microsoft Office and Microsoft Project.
- Have intermediate knowledge of engineering software (CAD software, EPLAN).
- What We Offer
- Interesting and diversified opportunities in the fast-growing energy sector.
- Interdisciplinary teamwork in a successful and dynamic company.
- Friendly working atmosphere.
