

Service Technician

Paralos Energy is looking for a Service Technician for Wind Farms in Greece.

Main Responsibilities

- Maintain and repair wind turbines at the Wind Farm.
- Monitor WTG performance and conduct all kinds of electrical, mechanical, technical, and preventive maintenance work.
- Provide daily reporting of technical issues.
- Maintain professional and effective customer communication.
- Ensure that Health & Safety procedures and quality requirements are followed.

Qualifications

- Basic academic degree in Electrical or Mechanical Engineering or a similar field.
- Minimum 2 years of experience as a Maintenance Technician, preferably within the electricity or engineering industry.
- Excellent knowledge of English and PC software skills for data upload, collection, and reporting.
- Possession of a valid driving license.
- Very good physical condition, with the ability to work at high altitudes and in adverse weather conditions.
- Ability to travel to Wind Farms across Greece.

What We Offer

- Competitive remuneration package.
- Continuous support, training, and education.
- Private Health Insurance.
- We look forward to receiving your application via our online form.
